Week 8 Homework - Vehicle Interface Package Between Autoware and Dataspeed Drive-By-Wire

1. In one or two sentences, explain what a "vehicle interface" does in the context of Autoware and the Dataspeed DBW system.

2. Autoware and the vehicle must communicate _____ so that Autoware can send control commands and receive feedback from the vehicle.

3. Give two examples of the kinds of commands Autoware sends to the vehicle through the interface.

4. Give **one example** of information the vehicle might send *back* to Autoware through the interface.

5. The figure in the documentation uses message names that are now deprecated. According to the module, how can you find the correct, up-to-date message names to use?
